KEY FEATURES

ENGAGING

With InGlass™ 20-point touch capability, multiple users can interact with the screen at the same time.

INTUITIVE

Experience natural touch functionality, a feature that allows you to annotate with your fingers, write with a stylus, or even erase written content with the palm of your hand with virtually no lag.

KEEP THEM CAPTIVATED

Showcase every vivid image on a 75" screen with 4K resolution. Plus, from virtually anywhere in the room, your audience will see consistent colors across the screen thanks to the wide viewing angle enabled by In-Plane Switching (IPS) technology.

LOOK FOR LONGER

Engage your audience's attention with crisp visuals and text. And Dell's ComfortView reduces blue-light emissions for greater eye comfort, allowing your audience to focus for extended periods of time.

EYE-CATCHING CLARITY

Keep the focus on your work, not distracting reflections or fingerprints, thanks to the anti-glare and anti-smudge coatings.

SPEAK TO YOUR AUDIENCE

Bring every video or audio element to life with the built-in 2x20W speakers.

QUIET

The powerful exhaust system uses forced air, which utilizes low noise variable speed internal fans. Background noise can be distracting in many environments, Decca's whisper-soft fans keep the system cool without the hum you often hear with other systems.
